Inaugurated on June 3, 2025, at Rome Fiumicino Airport, PIONEER is an energy storage system based on repurposed EV batteries.

The aluminum-plastic film of soft-pack batteries is mostly imported, and the production process is complicated. The automation level of the production line is not as high as that of square aluminum ...

Next-generation battery management systems maintain optimal performance with 50% less energy loss, extending battery lifespan to 20+ years. Standardized plug-and-play designs have reduced ...

What is a battery assembly solution? The comprehensive Battery Assembly solution can be equipped with an array of options, including unpacking, waste disposal, electrical testing, enclosure and casing ...

The company holds a leading market share in the sodium battery equipment sector, offers products covering all forms of technology, and features strong technical adaptability. It has been providing bulk ...

On January 15, Lead Intelligent announced the mass-production-level delivery of its integrated full solid-state battery production line solution.

European and American markets : We jointly developed sulfide solid-state battery equipment with QuantumScape and provided 70% of the core equipment for its pilot production line.

This not only accelerates the mass production process of perovskite cells but also successfully delivered a full production line of perovskite solar cell equipment to leading industry clients.

According to the agreement, Pioneer Intelligent will provide ABF with a smart production line service for lithium batteries with a total target of 20GWh. It is reported that this is the largest lithium battery ...

# Pioneer intelligent battery cabinet production line

From 2020 to 2021, we will rapidly promote the construction of production capacity, complete the trial production of 1GWh production line and build a 2GWh demonstration line, and successfully supply ...
