What can a portable power station Power?

A portable power station can power a wide range of devices. Small electronics: phones, tablets, cameras, drones, and laptops. Small household devices: Wi-Fi routers, desk fans, LED lights, CPAP machines, and projectors. Larger loads: TVs, mini-fridges, and gaming consoles.

How do I choose a portable power station?

A portable power station's maximum output tells you the total watts it can produce, which determines what you can and can't power with it. Look for a power station that can handle the combined wattage of the electronics you plan to plug into it.

Can a portable power station be used as an uninterruptible power supply?

Yes, a portable power station can be used as an uninterruptible power supply. Many portable power stations come with UPS features, like automatic switchover when power loss is detected.

Should you buy a portable power station?

Whether using a portable power station at home, camping, or on the jobsite as a power tool recharging station, it's vital to invest in a product that will withstand any method of transportation and any possible impact damage that could occur.
