What is a standard server rack?

Standard Server Rack A standard server rack is often quite a bit cheaper than more robust versions, but these are still long-lasting durable high quality racks designed for deployment in any data center in the country.

What is a server rack & cabinet?

Server racks and cabinets serve as the central point where all networking cables and devices converge. An open frame server rack features a framework of shelves upon which equipment rests, offering easy access.

Where are server racks made?

Since 1999, we have provided server racks, cabinets, and enclosures that continuously satisfy our customer's high standards and are Made in the USA! Our IT products are flexible and compatible with all rack mount servers or other electronics, to adapt to changing needs.

What is a UPS system rated at 200kVA?

A UPS system rated at 200kVA is used for server rooms, data centers and other critical environments. The kW-rating of such a UPS will vary depending on its output power factor. Monoblock UPS can be operated in a parallel/redundant N+X configuration to provide additional resilience.
