How much does a solar installation cost in France?

Shadows can significantly reduce the energy output of your solar panels. The price of a solar installation depends on several factors such as power (expressed in kilowatt-peak, or kwc), the technology chosen and installation costs. On average in France, count between 2500 and 4000 euro excluding tax per kwc for a residential installation.

Are solar panels a good investment in France?

As electricity prices continue to soar in France - up 60% in four years - more people are turning towards solar panel kits, which promise to help users save on energy costs and installation prices. The estimated extra cost of electricity in 2024, compared to 2020, is EUR540 per household per year.

Can you sell solar panels in France?

In France, it is possible to sell the electricity produced by your solar panels to EDF or another energy supplier. The feed-in price depends on the power of your installation and the conditions of the contract. The average lifespan of solar panels is around 25 years.

What inclination should a solar installation be in France?

In France, the ideal orientation is due south, with an inclination of approximately 30 to 35 degrees from the horizontal. Make sure that your solar installation is not exposed to shadows caused by trees, buildings or other obstacles. Shadows can significantly reduce the energy output of your solar panels.
