The amendment to the Construction Law Act of 4 December 2025 (the "Amendment") introduced new solutions relating to the construction process for energy storage systems. It specifies ...

An overview of Energy Storage Targets across 50 U.S. States, with state-by-state policy progress, key resources, and model rules.

We expect 63 gigawatts (GW) of new utility-scale electric-generating capacity to be added to the U.S. power grid in 2025 in our latest Preliminary Monthly Electric Generator Inventory ...

The IEA's flagship World Energy Outlook (WEO) is the most authoritative source of global energy analysis and projections. Updated annually to reflect the latest energy data, technology and market ...

This document offers a curated overview of the relevant codes and standards (C+S) governing the safe deployment of utility-scale battery energy storage systems in the United States.

The Department of Energy's (DOE) Energy Storage Strategy and Roadmap (SRM) represents a significantly expanded strategic revision on the original ESGC 2020 Roadmap.

Stay ahead of the curve with our comprehensive guide to energy storage regulations, covering the latest codes, standards, and best practices.

Article 706 Similar to 690, the changes for Energy Storage Systems, Article 706, add clarification to the requirements, rather than significant changes to the rules. Article 706 is still ...

Hybrid energy storage system challenges and solutions introduced by published research are summarized and analyzed. A selection criteria for energy storage systems is presented to ...

Requirements for new energy and energy storage

The need to co-optimize storage with other elements of the electricity system, coupled with uncertain climate change impacts on demand and supply, necessitate advances in analytical tools to reliably ...
