Does Slovenia have gas storage facilities?

Slovenia does not have gas storage facilities, and is dependent on infrastructure in Austria and Croatia. Slovenia has expressed interest in securing U.S. LNG sources via terminals in Krk, Croatia, or Rovigo, Italy, to diversify its supply. Beginning in 2027, Geoplin booked additional capacity to acquire LNG from the Krk terminal.

How many hydropower plants will Slovenia have by 2045?

Another pumped storage hydropower plant is seen by 2045. It would be able to generate 180 MW and store 2.6 GWh. The Integrated National Energy and Climate Plan envisages an overall 500 MW in gas power plants in Slovenia by the end of the decade.

Is green transformation a priority for Slovenia's recovery and Resilience Plan?

The Slovenian government has identified green transformation as a priority for its national recovery and resilience plan, allocating at least 43 percent of the EUR 2.5 billion funds requested from the EU Recovery and Resilience Facility toward this transformation.

What is Slovenia's energy industry like?

Slovenia's energy companies are active in developing innovative electricity transmission and distribution solutions, while the country's energy infrastructure is among the strongest in the region. Ministry of the Environment, Climate, and Energy Langusova 4, SI- 1000 Ljubljana, Slovenia

Slovenia targets 400 MW in BESS, 100 MW in electrolyzers and more pumped storage in the updated Integrated National Energy and Climate Plan.

Slovenia does not have gas storage facilities, and is dependent on infrastructure in Austria and Croatia. Slovenia has expressed interest in securing U.S. LNG sources via terminals in ...

This event will bring together key stakeholders from across the region to explore the latest trends in energy storage, with a focus on the increasing integration of energy storage into regional ...

The project of the Kozjak na Dravi pumped-storage hydro plant and the 400 kV overhead power line

connection to the Maribor electrical substation has been sited with the relevant national spatial plan.

We are pleased that, by the end of 2025, the storage facility will be taken over by Holding Slovenske Elektrarne (HSE), which exemplifies excellent cooperation between industry and the ...

Slovenia's energy landscape is undergoing a transformative shift, fueled by strategic investments and groundbreaking innovations aimed at enhancing renewable energy storage technologies.

By fostering cross-sector collaboration, prioritizing digitalization, and leveraging EU partnerships, Slovenia can accelerate its path toward energy self-sufficiency and climate neutrality, ensuring that ...

Slovenia's state-owned utility HSE is driving the country's energy transition with the deployment of 800MW of energy storage by 2035, including 590MW of pumped hydro energy ...

To bridge the winter period with minimal PV production, storage with a pumped storage power plant is planned. One of the assumptions of the national climate strategy has been incorporated into the ...

Summary: Slovenia is rapidly adopting advanced energy storage systems to support renewable integration and grid stability. This article explores the latest technologies, market trends, and ...
