How do energy storage contracts work?

For standalone energy storage contracts, these are typically structured with a fixed monthly capacity payment plus some variable cost per megawatt hour (MWh) of throughput. For a combined renewables-plus-storage project, it may be structured with an energy-only price in lieu of a fixed monthly capacity payment.

Are solar manufacturers circumventing antidumping and countervailing duty orders?

The solar market was further constrained by an ongoing petition before the US Department of Commerce alleging that certain solar manufacturers in Southeast Asia were circumventing antidumping and countervailing duty (AD/CVD) orders on solar cells and modules from China.

How many utility-scale storage installations are there in 2022?

While total 2022 installations have not yet been reported, utility-scale storage installations in the second quarter were the largest quarter on record with 1,170 MW installed, despite significant delays in the market.

What's new at DGS contract & procurement division?

DGS Contract and Procurement Division has partnered with OpenGov and is excited to announce our transition from a paper-based bid solicitation process to a fully automated, web-based electronic bidding and vendor management system. Our new e-procurement portal offers the following features:

The negotiation of an engineering, procurement and construction (EPC) agreement for a battery energy storage systems (BESS) project typically surfaces many of the same contractual risk ...

The District of Columbia, Department of General Services ("DGS" or the "Department"), Sustainability & Energy Division ("S+E") has an immediate need for a solar + storage analysis of its building portfolio ...
