-----  
Are Chinese-made solar inverters a security risk?

U.S. energy officials are reportedly reassessing the security risks posed by Chinese-made components in renewable energy infrastructure after discovering hidden communication devices inside certain solar inverters.

Could hidden communications equipment be found in Chinese-manufactured solar energy parts?

That has created a vulnerability that suddenly feels more real, as Reuters is reporting that experts have discovered hidden communications equipment in various Chinese-manufactured solar energy parts.

Can cellular radios be found in solar inverters?

The report cites US energy officials and warns that comms devices--including cellular radios--have been found in solar inverters, which are used to connect solar panels to electricity grids, and solar batteries acquired from multiple Chinese providers.

Why were solar power inverters disabled from China?

In November, solar power inverters in the U.S. and elsewhere were disabled from China, highlighting the risk of foreign influence over local electricity supplies and causing concern among government officials, three people familiar with the matter said.

Dozens gathered at a community meeting addressing the use of a large generator powering the 43-unit Alana Ola Pono homeless kauhale in Iwilei. Dale Krupa lives at the senior facility next door.

Multiple residents have contacted TLS with the concerns, citing persistent noise, vibrations, and significant disruptions to daily life. Neighbors who live near the site tell TLS the generators run ...

U.S. energy officials are reportedly reassessing the security risks posed by Chinese-made components in renewable energy infrastructure after discovering hidden communication ...

In a shocking revelation that has sent ripples through the cybersecurity and renewable energy communities, security experts have discovered undocumented communication ...

A couple living in a Miami-Dade community say the noise from a commercial generator placed in their

# Solar-powered communication cabinet generators disturbing residents

neighborhood is disturbing their peace

Sensitive people specifically exposed to solar inverter-generated dirty electricity have reported a range of symptoms, such as headaches, restlessness and sleep disturbances.

We live in the city, our neighbors are very close. Our backup generator kicks on once a week for approx. 20 minutes. It is loud and they are complaining. No matter when we adjust the time, they still ...

Cellular radios and other undocumented devices were found in solar inverters and batteries. The transition to clean energy without sufficient domestic manufacturing options has made ...

LONDON, May 14 (Reuters) - U.S. energy officials are reassessing the risk posed by Chinese-made devices that play a critical role in renewable energy infrastructure after unexplained...

Solar power generation systems are rapidly becoming widespread. However, there have been a number of reported cases of these systems emitting unwanted radio waves that interfere with ...
