Because its particles are packed close together, a solid is rigid, doesn't flow, and isn't easily compressed. A solid is defined as a state of matter with a definite shape and volume.

A solid is a substance that stays the same shape whether it is in a container or not. Solids turn to liquids at certain temperatures.

SOLID definition: 1. hard or firm, keeping a clear shape: 2. completely hard or firm all through an object, or....
Learn more.

SOLID principles are critically important in object-oriented programming because they directly address common challenges in software development, such as rigidity, fragility, immobility, ...

The meaning of SOLID is being without an internal cavity. How to use solid in a sentence.

Solid, one of the three basic states of matter, the others being liquid and gas. A solid forms from liquid or gas because the energy of atoms decreases when the atoms take up a relatively ...
