Who owns Solomon Islands towers?

In terms of ownership, the government had already established Solomon Islands Tower Company Ltd, trading as "Solomon Tower Limited" (STL), as the State-Owned Enterprise to own and manage the tower sites. The STL Office is located in the Eastern Wing (upstairs) of the Solomon Post building.

Can you build a tower in Solomon Islands?

Land in Solomon Islands is mostly customary-owned, and securing permission to build towers or lay cable can involve protracted negotiations with local landowners. There have been cases where planned rural tower sites were delayed or relocated due to unresolved land issues Budde.

Will Solomon Islands be connected by 2025?

The outlook, however, is largely optimistic. By 2025, Solomon Islands is far more connected than it has ever been, and all trends point upwards. Projects in the pipeline suggest that by the late 2020s, the vast majority of villages will have at least basic mobile internet, and many will have high-speed options via satellite or fiber links.

What are some recent developments in the Solomon Islands?

Below is a summary of key recent developments: Coral Sea Undersea Cable (Operational 2020): A 4-fiber-pair submarine cable linking Solomon Islands to Papua New Guinea and Australia. Completed in late 2019 and online by 2020, this project ended the country's reliance on satellites for international bandwidth Gihub.
