Who installed a high-performance battery energy storage system in Spain?

The installation of five high-performance Battery Energy Storage System (BESS) projects in various locations in Spain. One SunGiga was installed in Villena, one in Aguilas and three in Alicante. The installations were done by Cubierta Solar and the commissioning by Jinko ESS, with a close collaboration between both companies.

Why do we need energy storage systems in Spain?

Energy storage systems in Spain are a key element in the fight against climate change, as they help us to address the challenge of the energy transition. These systems make renewable energy production more flexible; and therefore help us to guarantee its integration into the Spanish electricity system.

How much storage capacity does Spain have?

According to data from Red Eléctrica de España (REE), storage has around 9.5 GW of capacity with connection points granted and almost 12 GW pending, totalling nearly 22 GW at various stages of processing.

How can battery energy storage help Spain achieve net-zero ambitions?

This project plays a significant role in supporting Spain and the wider EU in meeting their net-zero ambitions, as battery energy storage is a pivotal component in maximising the potential of renewable energy," said Roberto Murgioni, Head of ESS Europe at Jinko.

Find out all about how Iberdrola España is revolutionising energy storage with advanced solutions for a future of sustainable energy in Spain.

Discover how modular cabinet energy storage solutions are transforming Spain's renewable energy landscape while offering scalable power management for industries worldwide.

On November 7, Shanghai Cairi Energy Technology Co., Ltd. (Cairi Energy) announced a milestone strategic decision: the establishment of its first overseas joint venture smart energy storage ...

Jinko ESS announced that it has successfully completed its first Spanish installations. The installation of five

Spain's new energy storage cabinet factory

high-performance Battery Energy Storage System (BESS) projects in various ...

Iberdrola is set to enhance Spain's energy storage capabilities by installing six BESS installations with a total capacity of 150MW. The projects will be located across Castilla y Le#243;n, Extremadura, Castilla ...

Project locations are spread across much of Spain, with notable concentrations in Castilla-La Mancha, Castilla y Le#243;n, Extremadura, the Valencian Community, Catalonia and ...

Parallel, galp has begun the development of two major energy storage facilities in Spain and Portugal, adding a capacity of 74 MW, with advanced battery systems that include grid-forming technology to ...

Summary: Discover how Madrid-based large energy storage cabinet manufacturers are revolutionizing renewable energy integration and industrial power management. Explore applications, technical ...

A significant winner is Iberdrola Espa#241;a, which was awarded energy storage projects in six autonomous communities in Spain for a total of EUR170 million (USD 198 million) to build batteries, ...

Detailed info and reviews on 25 top Energy Storage companies and startups in Spain in 2026. Get the latest updates on their products, jobs, funding, investors, founders and more.
