What services does surgen offer?

Our expertise covers the latest equipment used on Telstra, Optus EJV, Vodafone and NBN networks. Indoor works such as rack installations, rectifiers and multiplexers, and base stations for 5G LTE, 4G, and 3G technologies. Outdoor works like antenna systems, feeder runs of every size, and cable tray installation. At Surgen we have you covered.

How can surgen help your telco infrastructure?

We understand that finding the right operators to keep your telco infrastructure running and appropriately maintained, can be a challenge. Surgen has the experience needed to operate and service your communication towers and help to avoid outages. Marketing 5G services through your tower locations can be a challenge particularly when they are new.

Why should you choose surgen Australia?

All of this makes Surgen Australia's choice when it comes to our complete range of Radio Frequency (RF) and Fixed Network (FN) technical services to the industry. We are harnessing the future for Australia. Contact us today to learn more about what we can offer you, our pricing, and the timeframe for all our services.
