This guide will help you understand the different types of plugs and sockets used in Suriname and how they compare to those you use at home, so you can be sure you have the right adapter for your trip.

What type of plugs and sockets are used in Suriname? When you are going on a trip to Suriname, be sure to pack the appropriate travel plug adapter that fits the local sockets.

Since Suriname also uses Type A and B outlets, you won't need a power adapter for your devices if they match these types. However, you may need a voltage converter if the device does not support 127V ...

North Americans may need an adapter for the outlets and a transformer for the voltage when traveling to Suriname. North Americans device plugs will not work with all outlet types in Suriname.

Travelling to Suriname? Check which plugs and sockets are used, the mains voltage, and whether you need a travel adaptor!

If you are traveling to Suriname with devices that use different plug types, you will need to bring a travel adapter. You can purchase travel adapters at most electronics stores or online.

This means that you will not need a converter or transformer but just a travel adaptor, because Suriname operates on a 127/230V supply voltage, which is within the 110-240V range that the dual ...

To ensure compatibility with Suriname's power outlets, you should purchase a power adapter that supports both the voltage and plug type mentioned above. Look for adapters that are specifically ...

This page contains links to step by step instructions showing you which power adapters you'll need to charge your devices when travelling to Suriname by using the F or C type 127 volt ...

Suriname portable power supply recommendation

In Suriname, the electrical voltage operates at two standards: 127 V and 220 V, with a frequency of 60 Hz. Travellers will encounter two main types of plug sockets: Type A, commonly ...
