---

Peak Energy, a Denver-based battery manufacturer, announced today the launch of the first grid-scale sodium-ion pyrophosphate (NFPP) battery system in the United States, which will be ...

Peak Energy announced the launch and shipment of its sodium-ion battery energy storage system (ESS). The solution delivers a patent-pending passive cooling design to dramatically reduce...

Recently, U.S.-based energy storage firm Peak Energy announced the commissioning of the world's first grid-scale sodium-ion energy storage system (NFPP) in Colorado.

The United States has activated its first large-scale, grid-connected sodium-ion battery system, marking a critical step in diversifying energy storage technology.

Peak Energy's sodium-ion phosphate pyrophosphate (NFPP) battery storage system was unveiled in July and is now running at the Solar Technology Acceleration Center (SolarTac) in ...

Peak Energy Delivers First Grid-Scale, Sodium-Ion Battery Storage System in the US. Peak Energy's solution is the first battery energy storage system to remove nearly all moving parts ...

Peak Energy has already deployed what it calls the first passively cooled, grid-scale sodium-ion system in Colorado. The company says the design could save over \$100 million in ...

Moonwatt launches Europe's first sodium-ion energy storage project in the Netherlands. The modular NFPP system marks a commercial milestone for alternative battery tech.

It is the first grid-level system for energy storage in the United States to use sodium-ion batteries, which are a third less expensive than a conventional BESS using lithium phosphate ...

# The first sodium-ion solar energy storage cabinet system

GS-1.1 is the first commercially available sodium-ion battery energy storage system built for grid-scale deployment. Powered by NFPP chemistry, it operates without active cooling- a global first at scale. ...
