What is the Timor-Leste solar power project?

The Project involves the construction and 25-year operation of a new power plant in Manatuto, Timor-Leste, comprising a 72 MW solar power plant co-located with a 36 MW/36 MWh battery energy storage system. This will be the country's first full-scale renewable energy IPP project.

Why did DLA Piper advise Eletricidade de Timor-Leste?

DLA Piper advised Eletricidade de Timor-Leste on its first utility-scale solar PV and battery storage project with a 100MW capacity, marking a major milestone in the country's renewable energy transition.

Why should Timor-Leste invest in solar & storage infrastructure?

Jos&#233; added: "The investment in Timor-Leste's solar and storage infrastructure is transformative. It will help reduce dependence on fossil fuels while improving grid stability and energy access across the country".

Jos&#233; de Ponte was supported by special counsel Marnie Calli, senior associate Lisa Huynh and solicitor Jeraldine Mow.

How has Timor-Leste benefited from a power purchase agreement (PPA)?

This landmark project included drafting and negotiating a power purchase agreement (PPA) and an implementation agreement with the Ministry of Finance, marking a significant step in Timor-Leste's transition to renewable energy and the modernisation of its electricity infrastructure. Jos&#233; de Ponte, Partner in DLA Piper's Finance practice, commented:

The study provided a methodology for the transition toward solar PV and energy storage, proving financial feasibility and confirming that they are the least-cost option to displace conventional diesel ...

As Timor-Leste accelerates its transition to renewable energy, the demand for lithium energy storage systems has surged. With solar and wind projects expanding nationwide, reliable power storage ...

This project combines high-capacity lithium battery storage, advanced hybrid inverters, and next-generation PERC solar panels to provide clean, reliable, and cost-effective power in a region ...
