Which electrical enclosures are rated for IP66 protection?

The S1 range of electrical enclosures are rated for protection up to IP66. This range is wall-mounted, powder-coated galvanised steel, single door construction suitable for heavy duty applications. The robust monoblock body is fabricated using galvanised steel sheet (1.2mm-1.5mm). Flat face sealing surfaces are provided to increase seal life.

What are the features of IP66 cabinets?

Features of our IP66 cabinets include: - Complete protection from solid objects of any kind. - High pressure jets from all directions, (limited ingress permitted). - Enclosure can be hosed down, eg. Ship decks. Often called rain tight enclosures due to their excellent weather resistance.

What is a hybrid ESS cabinet?

Designed to support grid-tied and off-grid scenarios, the Hybrid ESS cabinet offers seamless integration and maximized space utilization, making it an ideal choice for growing energy demands. With support for 200% PV oversizing and a maximum 40A DC input current, the Hybrid ESS Cabinet ensures high throughput for large-scale solar integration.

What are the different types of IP rated enclosures?

Choose from a variety of IP ratings (IP65, IP66, and IP67) to ensure the appropriate level of protection for your specific needs. Whether you require enclosures for indoor or outdoor use, wall mounting or external applications, we have the perfect solution for your project.
