Which government initiatives support data center development in Vietnam?

Government initiatives supporting data center development include forming AI Data Centers and developing new data centers that meet international green standards by 2025. The adoption of digital signatures among the Vietnamese adult population is targeted to rise from over 50% to over 70% between 2025 and 2030.

When will Viettel build a data center in Vietnam?

Vietnam's Ministry of Public Security plans to build its National Data Center 2 from 2026-2028 and National Data Center 3 from 2028-2030. Viettel started building its Tan Phu Trung 140-MW hyperscale data center with a design capacity of 10,000 racks in Ho Chi Minh City in April 2025, with expected full completion by 2030.

How big is Vietnam's data center market?

A recent report by Statista, a global business intelligence platform, shows that Vietnam's data center market revenue is projected to reach approximately \$2.2 billion in 2025. The market is forecast to grow at an annual rate of approximately 3.7% from 2025 to 2029, and reach roughly \$2.6 billion by 2029.

Will data storage requirements increase demand in Vietnam?

In addition, local data storage requirements set by Vietnam's Personal Data Protection Law, which was ratified by its National Assembly in June 2025 and will take effect in January 2026, are expected to increase demand for data storage services provided by data center operators.

Vietnam began implementing BESS systems from 2019. However, due to the lack of a complete set of policies and regulations for BESS development, most BESS systems in Vietnam are after-the-meter ...

The Cybersecurity Law requires providers of telecommunications, internet, cloud computing or data storage services (including data center operators) to store certain personal data, user activity logs ...

UPS Systems controlled 37.62% of the Vietnam data center power market in 2025. Adoption of modular, lithium-ion UPS enables incremental scaling that aligns with unpredictable AI ...

Saigon Asset Management in March 2025 announced its plan to build a 150-MW data center with a targeted

Vietnam Data Center Battery Cabinet Lightning Protection Model 2025

investment of \$1.5 billion. A consortium comprising UAE-based G42, Microsoft, FPT, ...

Each cabinet is usually composed of multiple battery modules, which is easy to install, maintain and expand. Modular design allows the capacity to be flexibly adjusted according to ...

As Vietnam continues to adopt solar and wind energy solutions, energy storage systems like Li-ion battery cabinets are crucial to store excess energy and manage peak loads.

The Vertiv(TM) EnergyCore Li5 and Li7 battery systems deliver high-density, lithium-ion energy storage designed for modern data centers. Purpose-built for critical backup and AI compute loads, they ...

Discover SolarEast's innovative BESS battery storage and cabinet ESS solutions unveiled at Vietnam Energy Week 2025.

This momentum is evident in the CBRE Asia-Pacific Investor Intentions Survey 2025, where Data Centers have surged to become the second most preferred alternative asset class in the ...

Government's new approved decision for the digital infrastructure in 2025 with a vision to 2030. Government initiatives supporting data center development include forming AI Data Centers and ...
