When should a safety cabinet be labeled?

Labels should state the type of hazardous chemical stored in the safety cabinet. For example, WHMIS pictograms can be used. This labelling informs workers and emergency responders of the hazards of the stored items in the cabinet. When should storage safety cabinets be used in a workplace? Generally, storage safety cabinets are used when:

What are flammable liquid storage safety cabinets?

Flammable liquid storage safety cabinets are cabinets that are specifically designed for the storage of flammable liquids. These cabinets provide temporary protection from a fire. For the cabinet to be effective, it must be used according to local fire code requirements and the manufacturer's instructions. Are storage safety cabinets regulated?
