-----  
How many people have electricity in Sierra Leone?

Very few people have access to electricity in Sierra Leone: Approximately 10% to 12% of the urban population and only around 2% of the rural population. Petrol or diesel generators are often used because most of the regions lack a stable public power supply.

What type of energy is used in Sierra Leone?

Energy consumption in Sierra Leone is dominated by biomass, which accounts for over 80% of energy used. The largest source of biomass energy is wood fuel followed by charcoal, while the use of agricultural crop residues and bagasse in the sugar industry remains limited.

How much hydro power does Sierra Leone have?

According to the "Renewable Energy Statistics 2017" report by IRENA, Sierra Leone has 56 MW installed hydro power capacity.

Does Power Africa support Sierra Leone?

Power Africa supported Sierra Leone in 2015 with a \$44.4 million four-year threshold program through the United States Millennium Challenge Corporation (MCC).
