Does El Salvador have a capacity to conduct renewable projects?

El Salvador has the national, political will to conduct renewable projects, as evidenced by the numerous incentives provided, the dire climate risks in the country, and their regional partnerships. While the institutional capacity is still catching up, to say they don't have any capacity would be false.

Does El Salvador have a telecommunication sector?

El Salvador's telecommunication sector has operated under a privatized legal and institutional framework since 1997, encouraging competition in most areas and allowing foreign investment.

Why does El Salvador prefer US technology products?

El Salvador's private and public sector prefers U.S. information technology products, which creates opportunities for water metering, smart traffic solutions, smart lighting systems, custom technology solutions, and city monitoring systems.

Where are solar panels installed in El Salvador?

Most of the country's installed solar panels are in government buildings, schools, manufacturing plants, and universities. The capacity of the largest PV system is 99 MW, with a total electricity generation of 489.6 MW. There are four hydroelectric dams located in El Salvador, all along the aforementioned Rio Lempa.
