Where are EV batteries made in the UK?

The Sunderland plant, operational since 2012, is Europe's first and the UK's only EV battery factory for over a decade, with an annual capacity of 1.8 GWh. In July 2021, AESC announced the construction of AESC's second Sunderland battery plant, which will be the UK's largest gigafactory.

Could a battery firm build a Gigafactory in Coventry?

Talks have taken place with a battery firm about the possibility of building a gigafactory in Coventry. Manufacturing firm Volklehas announced it will begin producing batteries at the UK Battery Industrialisation Centre and hopes to ultimately build a £1bn gigafactory in the next five years.

Will Britishvolt build a giant battery plant in Northumberland?

Plans to build a giant battery plant have collapsed after more than three years of uncertainty. Britishvolt planned to build a £3.8bn car battery factory in Cambourne, Northumberland, but the company fell into administration in January last year.

Where are AESC batteries made?

Based in Sunderland, North East England, the AESC UK battery plant plays an integral role in our commitment to growth, quality, and innovation alongside over 500 employees who work within it. The Sunderland plant, operational since 2012, is Europe's first and the UK's only EV battery factory for over a decade, with an annual capacity of 1.8 GWh.
